Professional Summary

Computer Science student with hands-on experience developing AI-powered applications, specializing in prompt engineering, LangChain workflows, and vector search indexes. Proficient in Python, RAG, LLMs, and vector databases, with a passion for leveraging Generative AI to build intelligent systems and automate workflows. Eager to contribute to Web3 AI assistant development.

Skills

Python, Prompt Engineering, RAG, LangChain, Vector Databases, OpenRouter API, LLM Evaluation, TensorFlow, Scikit-learn, Pandas, NumPy, Data Analysis, Flask, REST APIs, HTML, CSS, JavaScript, Streamlit, MySQL, PostgreSQL, ChromaDB (Vector DB), Git, GitHub, VS Code, Jupyter Notebook

Projects

AI Tutor with RAG & Verification

Ongoing

- Engineered an AI-powered tutoring system capable of answering questions from uploaded PDFs and web-based sources, utilizing Python, Streamlit, and OpenRouter API.
- Implemented Retrieval-Augmented Generation (RAG) using vector embeddings and document retrieval pipelines to enhance answer relevance and accuracy.
- Developed confidence-based response verification mechanisms to improve the reliability of AI-generated answers.
- Integrated OpenRouter APIs and LLM workflows for intelligent response generation, demonstrating expertise in prompt engineering and LLM orchestration.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering at Bennett University

2023-2027

CGPA: 9.2/10
